DETAILED ACTION

Continued Prosecution Application

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/8/02 has been entered.

Claim Rejections - 35 U.S.C. § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,2,4,6 and 7 are rejected under rejected under 35 U.S.C. 102(b) as being clearly anticipated by Matsui et al.

Regarding claim 1,2,6, 7 Matsui discloses a target surface (1) having a plurality of specified terminals forming areas (2) thereon, each of said specified terminal areas including one

or more terminal forming parts (51); forming an anisotropic layer (10) on said target surface so as to span said plurality of terminal forming areas; placing said plurality of electronic components on said anisotropic conductive layer individually above said plurality of forming areas and pressing the plurality of electronic components to said anisotropic conductive layer so as to thereby cause said conductive connecting members of the plurality of electronic components to individually become adhered to and in electrically conductive relationship with a corresponding one through the conductive layer . See Fig 5 (a), 5 (b) and (column 1, ln 49+).

Regarding claim 1,2,6 and 7, where a target surface having a plurality of specified terminal-forming areas thereon, each having a specified terminal forming areas including at least one terminal part therein, as in claim 1. Matsui discloses a target surface having a plurality of terminal-forming areas and terminal parts (2, 51). That forms a pair of terminal parts on a given surface. The first and second terminal-forming area and parts are closer to the third and fourth terminal area and part which is spaced apart from the fifth and sixth terminal.

Response to Arguments

3. Applicant's arguments filed 1/08/02 have been fully considered but they are not persuasive. The examiner has withdrawn the 112 second paragraph rejection in paragraph 2 of the office action dated 9/5/01. The applicant has argued the newly added limitation over comes the prior art in the office action dated 9/05/01. The examiner has reviewed the amendment and has maintained the rejection in response to the 1/08/02 amendment. Matsui clearly discloses the

Art Unit: 3729

distribution of the terminal forming part (51, Fig. 5a) over terminal-forming areas (2) as illustrated in Figs. 5a and 5b.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sean Smith whose telephone number is (703) 305-0831. The examiner can normally be reached on Monday thru Friday from 6:30 AM to 3:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo, can be reached on (703) 308-1789. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-7058.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1148.
